## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/14/04 has been entered.

### *Response to Amendment*

2. Applicant's amendment was received on 10/14/04, and has been entered and made of record. Currently, **claims 1-3, 5, 7-13, and 18** are pending.

### *Allowable Subject Matter*

3. **Claims 1-3, 5, 7-13, and 18** are allowed (**renumbered as claims 1-12, respectively**).

4. The following is an examiner's statement of reasons for allowance:

Regarding *claims 1 and 18 (renumbered claims 1 and 12, respectively)*, in the examiner's opinion, it would not have been obvious to one of ordinary skill in the art to have a facsimile system, as claimed, include an instruction means (or circuit) within the facsimile machine include means (or a device) to enable an operator to command retrieving the data of addressee identification from the computer to the facsimile machine, and means (or a device) to enable the operator to command registering the data of addressee identification information. The

closest prior art, indicated as Ryan (U.S. Patent Number 6,559,979), fails to expressly disclose these features. Particularly, as seen in step P26 in Fig. 7, Ryan does teach of reporting the registration of a registration at the fax machine. However, Ryan does not teach of enabling an operator to command retrieving data of addressee identification from the computer, and to command registering the addressee data in the computer. Further, the previously cited prior art, Witek (U.S. Patent Number 5,461,488), Houghton *et al.* (U.S. Patent Number 6,009,153), Feder (U.S. Patent Number 5,872,845), and Rachelson (U.S. Patent Number 6,157,706), each fail to specifically teach of these features, along with limitation of displaying the addressee identification information fetched out of the computer in case of facsimile transmission so that a desired piece of addressee identification information is selected. Because of these reasons, the claims are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Drawings***

5. The drawings received on 1/21/99, along with the corrected drawing sheets received on 2/28/02, are acceptable by the examiner.

***Citation of Pertinent Prior Art***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

**Yokota *et al.*** (U.S. Patent Number 5,598,533) discloses a system that includes a personal computer and a facsimile that communicate, wherein the personal computer and the facsimile share various memories; and

**Satomi *et al.*** (U.S. Patent Number 5,048,078) discloses a communication system between a facsimile apparatus and a computer.

***Conclusion***

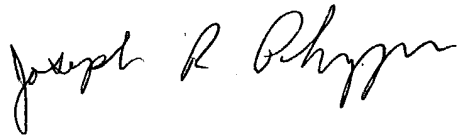

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joe Pokrzywa whose telephone number is (703) 305-0146. The examiner can normally be reached on Monday-Friday, 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles can be reached on (703) 305-4712. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
